

Untouched nature touches our hearts

As a travel destination, Switzerland is synonymous with spectacular mountains, wild gorges and mystical forests; our nature has the power to provide energy. We aim to preserve this – for many generations to come.

Grindelwald, as one of the top destinations - a place of invigorating power - spectacular.

The Parkhotel Schoenegg preserves and maintains this versatile offer – energy giving, mindful of nature.

A New Approach to Travel

Sustainable travel doesn't necessarily mean having to go without. Sustainable travel means greater awareness and depth as well as more enjoyment. With this in mind, Switzerland follows its own sustainability strategy: Swisstainable.

Swisstainable is all about having one's finger on the pulse – maximum relaxation in a natural setting:

- Enjoy nature up close and at first hand
- Experience the local culture in an authentic way
- Consume regional products
- Stay longer and immerse yourself

At Parkhotel Schoenegg we attach great importance to untouched nature; you can experience the local culture in the hotel and with our Grindelwald experts. The majority of products we use are from local producers and our regular guests are rooted in the village.

Facts and Figures

What makes Switzerland a sustainable travel destination.

One of the most closely-knit rail networks in the world, recycling champions, and impressive air and water quality – Switzerland is leading the way towards a sustainable future

Mobility

Every day, 9,600 trains travel along the roughly 3,000-kilometre-long SBB network. Even small and remote locations can be reached by public transport. SBB sells around 3 million travelcards every year.

At Grindelwald train station you will be greeted by the Parkhotel Schoenegg staff (from autumn 2023 with E-VW bus). We will be happy to reimburse you for a "Sustainability-Baton". The region's rail tickets are included in your package.

Water

Switzerland invites guests to swim in the middle of its cities – a truly unique experience. Boasting some 1,500 lakes, Switzerland is seen as Europe's moated bastion, and is home to the sources of many rivers, including the Rhine and the Rhône.

You will be able to taste "glacier water" at Parkhotel Schoenegg.

Nature conservation

A total of 19 Swiss parks make up more than one eighth of the land area (5,269 km²). For the past 125 years, the Swiss Forest Act has also been ensuring that 30% of Switzerland remains forested – number rising.

The Parkhotel Schoenegg has its own "forest".
You will discover a surprise when exploring it.

Air

The air quality in Switzerland is excellent. We have always been appreciated as a climatic spa destination with beneficial therapeutic effects, and the health-promoting climate of the mountain air was discovered as far back as 1853.

The Parkhotel Schoenegg offers particularly pure air with plenty of surrounding garden space, large trees, lush plants and you will sleep like or with the marmots.

Food

Compared to our international counterparts, we consume the most organic products per capita. And Swiss retailers have been leading the international sustainability rankings for years.

At Parkhotel Schoenegg you can enjoy herbs, potatoes, carrots and so on from our own cultivation - try the Schoenegg chips!

Recycling

Switzerland is one of the world's leading countries when it comes to recycling and waste management, with almost 90% of PET bottles being put to new use.

On a tour in and around Parkhotel Schoenegg, you will discover local materials made by local craftsmen. The suppliers come from the village or the region.

Our lived hospitality for 130 years speaks for sustainability.

- The long affiliation of our employees stands for sustainable satisfaction and solidarity
- The staff studios on the hotel grounds enable short walking distances to work
- The electricity-saving credo of individuals creates awareness every day
- We wash our laundry in our own laundry facilities
- We have been heating with Grindelwald's CO₂ neutral wood heat since 2010.
- We grow some of the potatoes for the Schoenegg chips ourselves
- We compost most of our waste
- Bath slippers are no longer wrapped in plastic
- Schoenegg chips are packaged in recycled and recyclable paper
- We buy almost exclusively local products - short delivery routes
- Separating waste is a matter of course
- Involvement with sustainable organisations and associations (Eigerness)
